Session #1 - Long term planning

Time	830am-850am
Topic	Long-term implications of geochemical risk stored at the Faro Mine Complex
Abstract	N/A
Presenter(s)	Dustin Rainey, Yukon Government - Assessment and Abandoned Mines
Bio(s)	Dustin is a geoscientist who specializes in near-surface water-rock interaction, particularly in relation to mine water management, mineral exploration and mineral springs research. He has spent the past 9 years working in Yukon Government's Assessment and Abandoned Mines branch, with most of that time focussed on the Faro Mine Remediation Project.
